

Book lover, hockey fan, equestrian, and avid collector of the nerd world. You can find me in my natural habitat, camping in the woods with my dogs on the weekends.

I am a multidisciplinary designer acting at the intersection of motion and usability to create strong, to create a lasting and remarkable design.

## Experience

### DIGITAL MEDIA DESIGN - Dealer.com – Mar 2017-Current

Produced digital advertising collateral including banner advertisements, promotional landing pages, and social media advertisements. Projects include coding interactive display advertising with HTML5 and Javascript.

### UX DESIGNER- Iris by Lowe's – Aug 2015- Feb 2017

Worked with a small team on an Internet of Things connected home project. Collaborated on and maintained design style guides, asset production, and marketing materials. Worked with the senior designer on a variety of one-off projects as the project required. Worked on initial sketches and designs for the web interface.

### VISUAL DESIGN INTERN – Jul 2014-Oct 2014

Focused heavily on user research including user flows and personas, documentation, and asset generation. Live customer experience surveys were developed and were a top priority of the project. These tests were carried out in various markets.
